Professional Summary

Senior Frontend Developer with six years of experience building and owning user-facing products at scale, with a fullstack background spanning React, Next.js, TypeScript, Node.js and Go. I take features from requirements to production and care about what happens after they ship. Currently completing a Master's in Cybersecurity at University West in Sweden, graduating June 2026, which shapes how I think about frontend architecture with authentication flows, data exposure, and third-party integrations.

Skills

Cybersecurity: OpenVAS, Nessus, OWASP ZAP, Cloud Security, Identity & Access Management, Threat Modeling

Cloud & Infrastructure: Git, AWS, Azure, Google Cloud Platform, Docker, CI/CD

Frontend Development: HTML, CSS, TypeScript, JavaScript, React, Next.js, React Native, TailwindCSS

Backend Development: Node.js, Express.js, NestJS, Python, Go, GraphQL

Databases: PostgreSQL, MySQL, SQLite, Firebase, MongoDB

Experience

Senior Frontend Developer, NEXT BASKET – Sofia, Bulgaria June 2024 – August 2025

- Improved render performance on high-volume order pages handling 10,000+ unpaginated records by implementing ag-grid with useMemo caching and session storage, reducing load times significantly for end users
- Established frontend testing standards across the Next.js platform introducing unit and integration tests that improved code maintainability and reduced regression bugs
- Rebuilt the order creation and editing flow from scratch under a tight deadline, resulting in 70% improved customer satisfaction ratings
- Architected and deployed a shared AI chatbot package across two architecturally different platforms using a private npm registry and CSS-in-JS, reducing duplication and establishing a single source of truth

Software Engineer, National Center for AI and Robotics – Abuja, Nigeria August 2023 – May 2024

- Trained 100+ members in Machine Learning and Python programming through engaging workshops
- Developed innovative applications using machine learning frameworks like TensorFlow
- Led development of an ML-powered ailment detection system that reduced diagnosis time from hours to minutes

Fullstack Web Developer, Freelance – Abuja, Nigeria September 2022 – July 2023

- Delivered 20+ full-stack web applications across finance, healthcare and NGO sectors using Next.js, Node.js and React Native, maintaining an 80% client satisfaction rate
- Built and deployed complete products independently, from backend APIs with Node.js and PostgreSQL to mobile applications with React Native, taking full ownership of architecture and delivery

Fullstack Web Developer, 3.14 Limited – Abuja, Nigeria June 2022 – September 2022

- React web application integrated with Firebase and live IoT device data.

Fullstack Web Developer Intern, Yiaga Africa – Abuja, Nigeria August 2021 – September 2021

- Built interactive data visualisation platform using React, Next.js and D3.js.

Fullstack Web Developer, Logical Address – Jos, Nigeria September 2019 – December 2019

- Fullstack web application using Preact and Node.js with Firebase storage.

Mobile Application Developer, Mercy Corps – Abuja, Nigeria May 2019 – September 2019

- Internal Flutter mobile app deployed across rural Northern Nigeria.

Education

Master in Cybersecurity – University West, Sweden Expected June 2026

Bachelor of Science in Software Engineering – American University of Nigeria May 2022

Language

English – Fluent

Swedish – Basic
